

IT'S **NOT** TOO LATE

**THE BOOK
EVERY OVER 40
NEEDS TO READ**

**HOW TO IMPROVE YOUR
BODY AND LIFE THROUGH
HEALTH AND FITNESS**

INTRODUCTION

"A FIT, HEALTHY BODY—THAT IS THE BEST FASHION STATEMENT"

— JESS C SCOTT

"TOO MANY PEOPLE, WHEN THEY GET OLD, THINK THAT THEY HAVE TO LIVE BY THE CALENDAR."

— JOHN GLENN

Right about now you're most probably thinking "Why the hell should I take the time to read this book???"

...There's literally gym loads of fitness pro's out there telling me what I NEED to do.....but I don't have the time, motivation, money or lifestyle to get it done!

And you have a valid point! If I were you I'd be asking myself exactly the same question – our time is precious and should never be wasted!

SO WHY ME? WHY NOW?? WHY THIS BOOK???

These are great questions, and I'll get onto answering these after I've said a massive "hello and welcome".....you've started reading!!

WHY ME?

I realise there are countless books you could be reading right now, but you're here, with me and my book! It's flattering and I feel privileged to be here with you.

Which is why I want to tell you HOW I'm different, and why you should continue to read and listen to me....

Firstly, I'm not interested in teaching you the same things that the other coaches, companies or robots constantly spout in a series of re-packaged offerings!

Lies, deception and cons aren't, and never will be, my cup of tea – I don't even like tea!! I get sick and tired of these so-called experts teaching people the latest fad, gimmick or magic diet.

They jump from one approach to another – leaving their victims feeling unsatisfied, ripped-off (but not ripped!), pissed-off and often less fit, healthy and happy than then felt before!

IT'S NOT RIGHT, and if that is what you're after you'd be better stopping reading right now! Instead, I want to show you how to build a happy, real and sustainable lifestyle that you will enjoy for years to come.

How to create an energised, exciting and elegant life that will see you not depressed and desperate for '**a break or holiday**', but enthusiastic about each day, and each week.

And the satisfaction and respect that comes with that – not just from you, but from those around you.....your family, friends, partner, husband, wife, children, colleagues.....

I WANT TO HELP YOU CREATE THE BEST YOU!

You see, over the last couple of years my life has drastically changed. I started as a senior manager in a company and industry I had no interest in, or passion for!

Now I'm a highly sought-after Fitness Professional known for getting people to where they want to be – **and staying there!**

I've appeared in a number of publications, am followed by multiple thousands of people around the world, and of course – **am changing people for the better.**

WHY NOW?

If you are waiting for the perfect conditions it's going to be a long long wait.....
There will always be...

- Challenges to solve...
- Bills to pay...
- Events to attend...
- Issues to overcome...
- Things to buy...
- People to see...
- Jobs to do...

The perfect time is now, and you need to make it happen **NOW**.

Have you ever spent any time in Tomorrow? NOPE – me neither!

AND FINALLY.....WHY SHOULD YOU READ THIS BOOK?

Simple – because this is the book I wish someone had whacked me across the face with a couple of years back!

WOW –it would have saved me hundreds of hours of learning and numerous costly mistakes!

Not because it's the greatest, most complicated, informative and in-depth fitness book that's ever been written...

BUT, because it's an easy to read, down-to-earth, quick read that will help people transform their health, fitness and life without the negative side effects that come with most fitness programmes!

Again.....I'm super excited and thrilled that you have answered my heart-felt 'call to action', and now have this fine ebook firmly within your digital grasp!

And that grasp is going to get stronger, as will you!!!

You have taken the first steps to transforming your body, and in fact your life.....maybe even the lives of those closest to you!

That seems like a very bold claim – right! It is, but it is also true!

Whilst I believe this book will benefit just about anybody who reads it and implements the suggested actions, I also KNOW that as we get older the commitments and responsibilities begin to grow along with our waists!

The basic daily tasks can seem harder than they did in our younger years, and the energy levels to 'do what we know we should do' aren't always present!

DOES THIS SOUND LIKE YOU?

If it does please do NOT despair – you are in the absolute correct place to put it right – just stick with me, fully read this book and implement the actions, even if some of them require a 'leap of faith' or a step outside of your comfort zone!

IT'S NOT TOO LATE!

Now, each of you reading this will most probably have a whole host of reasons for wanting to get fitter and healthier, and many of these are likely to be specific to you and your circumstances.

However, I just thought I'd 'wet your appetite' (healthy appetite of course!) for what your life could be like if you follow the instructions and advice in this book.

IF YOU IMPROVE YOUR HEALTH AND FITNESS YOU WILL SEE MANY PROVEN 'LIFE' BENEFITS SUCH AS...

- Improved Self Esteem
- Better Sleep
- Weight Loss
- Improved Energy Levels
- Have More Fun & Make New Friends
- Reduced Risk of Anxiety & Depression
- Improved Balance & Coordination
- Strengthened Immune System
- Better Daily Productivity
- Increased Metabolic Rate
- Improved Focus & Concentration
- Better Sex
- Reduced Aches & Pains
- Extended Lifespan

AND HOW DO YOU THINK THIS WILL AFFECT THE CHILDREN AND PEOPLE AROUND YOU?

Well, let's look at children.

Children don't do what they are told, they copy what they see!

It's common place to see parents with unhealthy eating habits and unhealthy lifestyles having *children with unhealthy eating habits and unhealthy lifestyles!*

It's not always the case, but, unfortunately, it's a strongly linked cycle whether we like to think so or not!

Now, back to '**It's Not Too Late**'...

I don't want to fool you! Will implementing '**It's Not Too Late**' be super easy? **Absolutely Not!**

Will it be worth it!? **Absolutely – 100% it will!!** Nothing worthwhile is ever easy!

I'm certain you will find some of my advice and coaching a little eye-opening, maybe even surprising, but also invaluable!

I really believe this will be a positive life changing commitment you have just made if you follow it through – I salute and respect you for that!

And please be assured, with me as your coach, you are in the very 'safest of hands'. I genuinely do care about people's fitness, and strive to help as many people as I can. If you give me your commitment, I give you my word – "I will not stop helping you until you get the results you are after".

For those of you who don't know my story, I am a 43-year father of 3, who after years in a corporate management position, ditched it all to follow my passion and calling in 'health & fitness'.

It's not been easy, again – nothing worthwhile ever is, but I've carved a reputation as a highly successful online fitness professional, due to the simple fact that I get all my committed client's **genuine and amazing results!**

The simple fact is this – each and every person who follows my methods, and puts the work in, WILL get awesome results, and I promise you, you will get them to!

You only need to review the feedback and comments I get on social media to realise I'm the 'real deal' at this!

"It ain't no joke to me – it's my life!"

And by starting with my unique 'It's Not Too Late' programme you are on the road to being another success story! Changing people's lives for the better, getting people the results they 'dream of' and giving my clients the coaching, tools and the blueprints to 'level up', is a true and unrelenting passion I have!

Whatever your reason for wanting to transform your body – ***it's your reason and totally valid!***

Whether you are doing it to 'pump up' your self-confidence, whether you want to have the energy to keep up with your kids, whether you are fearful of ill health as you get older, whether you have a holiday coming up and want to be 'shredded' on the beach, whether you want to impress that man or woman, whether you want to compete in a fitness competition, whether you just want to look and feel amazing – whatever your goal **IT IS THE MOST IMPORTANT TO YOU**, and that's all **that counts!**

Dare to dream big, and then let's make those dreams a reality!

Yours in Fitness

IAN DAVID WORTHINGTON

Creator, Owner and Coach at GymWolfPT.com

THE MINDSET PHILOSOPHY

***“ONCE YOUR MINDSET CHANGES, EVERYTHING ON THE OUTSIDE
WILL CHANGE ALONG WITH IT.”***

– STEVE MARABOLI

It's often overlooked in the vast 'info infested ocean' that is the fitness industry, but it is so important I needed to put it first in my 'It's Not Too Late' programme.

WHAT IS IT!? – MINDSET!!!

If you're not happy with the way your body looks and feels at the moment, you're certainly in the right place to complete your transformation via working out the right way and eating correctly.

However, before you clean up your diet and hit the workouts, you must first re-programme your mind and set it up to succeed!

It starts with body image, and that voice inside your head.

All too often, we focus on the negatives.

Have you ever caught yourself saying things such as...

- **“My legs are so chunky”**
- **“I'm so fat” – “I'm weak and skinny”**
- **“I don't like the way my stomach looks”**
- **“I'm too old to get in shape”**
- **“I hate the way my clothes fit”**
- **“I've so little muscle”**
- **“I used to be able to do it, but now I can't”**

These may seem OK things to think, but if you're serious about building a better body, making lasting lifestyle changes, and boosting your confidence level, you have to change your focus... start to focus on the positives!

The next time you catch yourself procrastinating on a negative thought, switch to the positive, and tell yourself:

- **I am powerful enough to work-out every day**
- **I'm making the choice to eat healthier meals**
- **I'm in control of my life, my food choices, and my exercise habits**
- **Even if I mess up, I'm going to keep going until I reach my goal**

QUICK MINDSET EXERCISE

Looking for a quick and easy way to remind yourself to change the way you think? Try this...

1) Breathe in: Think about your goals, your future, and who you ultimately want to become.

2) Breathe out: Let go of any resistance and negative self-talk.

Now, the above is a very simple and basic approach to 'mindset change', but I certainly want to arm you with more than just 'simple and basic' weapons!

The mind is our most powerful asset, so we need powerful ways in which to control it.

In this first section of **'It's Not Too Late'** I am going to arm you with the 'weapons' and the exercises needed to set your mindset up for the upcoming transformation it is going to bring about!

MINDSET PHILOSOPHY PART ONE: “THE MINDSET RESET”

Mindset is pretty much the most important thing in everything we do, and this certainly applies when it comes to transforming our physiques.

The mind is the General, the body is the Soldiers!

Your mindset determines everything; - whether you do something or don't!

- **Whether you are happy or sad!**
- **Whether you love the world or hate the world!**
- **Whether something is possible or impossible!**
- **Whether you will succeed or fail!**

The mindset you have right now has taken you exactly to where you are right now.

However, if you want something new, something you've never had before – you need a mindset you've never had before!!!

You **MUST** focus on what can be achieved rather than the negatives, the obstacles and the excuses!

Excuses really only sound good to the person making them!

When thinking about transforming their bodies, most people focus on the negative aspects rather than the positive aspects!

They 'fret' about the foods they won't be able to eat, the workouts they will hate, the discipline they will have to install – **AND THEY LITERALLY MAKE A MOUNTAIN OUT OF A MOLE HILL!**

But – please, please, please – realise that if you keep such a mindset you will never succeed, never progress and never live life to your full potential!

It really is as simple as that!

Whether you think 'you can' or think 'you can't' – **YOU ARE RIGHT!**

The truth is that today you are most probably in the worst shape you will ever be in for the rest of your life if..... and it's a big if.....you are able to shift your mindset from how it is right now, to visualising how awesome you are going to look, feel and become on completion of your goals!

You need to truly believe you can do this, and I promise you that you will do it!!

Not possibly, not maybe, not 'I might' – **I WILL DO IT!**

What the mind believes the body achieves!

The below mindset based exercises will shift your focus from what you might have to “give up” to what you’re going to **GAIN** by getting fit and healthy!

By doing this you will set your conscious and subconscious mind on the right track – the track that benefits you and sees you achieve your goals!

MINDSET CHANGE EXERCISE NO.1

When creating a goal, you must make it S.M.A.R.T!

This means your goal(s) are

- **SPECIFIC**
- **MEASURABLE**
- **ATTAINABLE**
- **REALISTIC**
- **TIME-BASED**

By having S.M.A.R.T goals you have everything you need to create a ‘plan of action’, review it, make adjustments and complete it.

Some examples of S.M.A.R.T goals are:

“I, Ian, am going to lose 15 kgs of body fat by 30th January 2020”

Or

“I, Rachel, am going to reduce my 10K time by 3 minutes by 15th December 2019”

Or

“I, Stephen, am going to lose 2 inches from my waist by the end of February 2020”

Your goals should be challenging, but also must be realistic! In the space provided on page 14, please write out your goals in a S.M.A.R.T style format.

MINDSET CHANGE EXERCISE NO.2

Once you have written out your S.M.A.R.T goal(s), please keep these by your bed and read them each morning and night.

Read them 5 to 10 times, ideally out loud, each morning when you get up, and 5 to 10 times each night before you go to bed.

By doing this you will start to install them in your subconscious mind.

This will keep you focused, as the mind subconsciously seeks to find solutions to your problems.

And if during the course of this programme you stumble upon an additional goal or two, be sure to add these in as well!

We don't 'stand still' round here, we keep 'moving forward'!

[illegible]

MINDSET PHILOSOPHY

PART TWO: “RAMP UP YOUR MOTIVATION”

Some days you won't feel like it – you won't want to do the workout, eat the clean diet, do the cardio!

Those days might come at the start of the programme, they might come in the middle, they might come at the end – *or they might be there right the way through.*

You don't make an amazing transformation just by reading about it!

You don't get the body you want just by saying you're going to do a programme.

You get results by putting in the work, the discipline and the sweat each and every day!

I am giving you everything you need for success – but you need to actually put it into action to get the results!

So, you need to get motivated – and there are ways to do this – trust me!

Motivation is the bridge that starts at new behaviours and leads to new habits! When this happens and a new behaviour transforms into a habit, whether that's working out regularly, getting to sleep earlier or eating more good fats and protein, it starts to become easier and easier, until eventually you don't even have to think about it – ***you just do it!***

We need to turn the bad habits into new good habits, that benefit our goals and lives! And here's how to do it.....

MINDSET CHANGE EXERCISE NO.3

Take some quiet time alone, and write down at least 10 reasons why you want to transform your health and fitness.

This should be personal reasons that actually mean something to you.

MINDSET CHANGE EXERCISE NO.4

From the list of reasons you've created, pick out the 3 most important reasons why you want to transform, and write them out on the next page.

Then add WHY those reasons are so important to you.

For example, if one of your reasons is that you want to be fit and healthier for your children, write out why that's important to you.

Do you struggle to keep up with them? Are you worried about future disease and illness?

Make the reasons as compelling as possible.

MINDSET CHANGE EXERCISE NO.5

Place the piece of paper with your 3 reasons on it somewhere you'll see it every single day.

Put it on your fridge, on your bathroom mirror or your bedside table - put it where you will see it every day!

You need to remind yourself of these reasons each and every day to keep your motivation and focus high.

If you don't it will all seem to hard!

Each day tie all of your daily behaviours back to your 3 reasons.

Each decision you make today, tomorrow and going forward needs to tie back to those 3 reasons!

The reason so many people fail to achieve their goals is simple!

They spend the majority of thinking on the what they are "giving up" rather than what they are gaining!

Switch that and you will win!

They forget about WHY they want to transform in the first place, and why those specific reasons are MUCH more important than the short-term pleasure of eating some 'processed junk food'. That 'processed junk food' you are eating doesn't make you happy, I know this for sure.

You eat it and it tastes delicious...

...BUT...10, 15, 20 minutes later you are hit with a shot of guilt that you broke your diet or eating plan.

And the lack of nutrients, the lack of healthy macros and the inclusion of stabilisers, sweeteners, preservers and a whole host of other unnatural additions make your body feel like crap!

This needs to stop, and we are going to stop this from happening to you over and over again, starting now!!

YOUR TEN (OR MORE) REASONS:

This image shows a single sheet of white paper with horizontal blue ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

**THE 3-STEP
SYSTEM**

THE WORKOUT PHILOSOPHY

GYMWOLFPT

PHYSICAL FITNESS IS NOT ONLY ONE OF THE MOST IMPORTANT KEYS TO A HEALTHY BODY, IT IS THE BASIS OF DYNAMIC AND CREATIVE INTELLECTUAL ACTIVITY.

– JOHN F. KENNEDY

GENERAL RULES (FOR ALL WORKOUTS):

The following pages contain Gym and Home-based workouts aimed at beginners, intermediates and experts.

However, the below ‘general rules’ need to be applied to each workout, every time.

- ✓ An adequate warm-up and cool-down must be completed pre and post workout.
 - Warm-up: 5-10 minutes of light intensity cardio to raise your body temperature. Follow this with dynamic stretches, specifically focusing on the muscle group(s) you will be working.
 - Cool-down: 3-5 minutes of very light intensity cardio to return your body to its normal state. Follow this with static stretches.
- ✓ Correct form, technique and range of motion must be kept at all times. If you are unsure of how to perform an exercise do not ‘guess’ or ‘wing it’! Ask, search on Google/YouTube for exercise demonstration/instructions, or better still check with your coach (me)!
- ✓ If any of these exercises aggravate or cause an injury, stop immediately and seek medical help.
- ✓ Drink plenty of water during each workout. Always stay well hydrated.
- ✓ Always start with a light weight until you have mastered the form, technique and range of motion. Once you have mastered the exercise, aim to safely progress the weight each week, even if only by 1kg or 1 pound.
- ✓ When lifting heavy with free weights or on a bench, ensure you have a ‘spotter’ present.

- ✓ Log your sessions, either via a Gym Notebook or Phone App (the GymWolfPT App is the very best for this!).
- ✓ You should be logging sets, reps, weights, rest times and any other useful information.
- ✓ Before using any equipment or machine at the gym, or at home, ensure it is in 'working order' and safe to use.

Whilst I have added sets, reps and rest times to each workout plan, this should be adjusted to fit your specific goals. The below are the general 'rule of thumb' for specific fitness goals:

✓ **TRAINING GOAL: GENERAL FITNESS**

A General Fitness programme should target both strength and muscle building.

When deciding on reps and sets, somewhere in the range 8 to 15 repetitions for 2 to 4 sets will help you accomplish both.

✓ **TRAINING GOAL: STRENGTH**

Strength training uses the most weight, least number of reps, and longest rest periods.

When your aim is building strength, lift heavier for fewer reps, compared to when you're trying to build muscle size or muscular endurance.

For example, you might use a '5 x 5 system'. That means five sets with five reps in each set. You'll use higher loads for these reps and sets, and also take a longer rest between sets (3-5 minutes).

But never compromise on form and safety! these reps and sets, and also take a longer rest between sets (3-5 minutes). But never compromise on form and safety!

✓ **TRAINING GOAL: MUSCLE HYPERTROPHY.**

Hypertrophy for muscle size and bodybuilding training utilises lighter weights, more repetitions and less rest time.

Your muscle requires metabolic stress to increase in size. This means working the muscle to the point where lactate builds and your muscle suffers internal damage. It's during your rest that the repair and growth occurs.

This training requires a higher number of reps in each set, in order to stimulate that breaking point, sometimes referred to as "training to failure." A typical approach to reps and sets for those looking to build muscle might be three sets of eight to 12 reps, at loads that reach failure point (or near) on the last couple of reps.

✓ **TRAINING GOAL: MUSCULAR ENDURANCE**

Endurance weight training requires more reps in each set. This can be as many as 20, or even 30 reps with lighter weights.

✓ **TRAINING GOAL: POWER**

Training for power involves lighter weights than strength training and longer rests while concentrating on the speed of execution the lift. “Power” is defined as the ability to move an object at a high speed.

Power training requires practicing the acceleration part of a lift, then resting and repeating. In power training, you lift moderately heavy weights, accentuate the concentric first movement of the exercise, then rest sufficiently to recover before doing that rep or set again.

You need to ensure each push, pull, lunge or squat movement is performed at a quick tempo.

✓ **REST PERIODS**

Rest between sets fall within these ranges for different training goals:

- **General: 30-90 seconds**
- **Strength: 2-5 minutes**
- **Muscle Hypertrophy: 30-60 seconds**
- **Muscle Endurance: 30-60 seconds**
- **Power: 1-2 minutes**

GYM BASED WORKOUTS:

EXAMPLE WORKOUT PLAN:

BEGINNER

This workout is aimed at 'gym goers' with very little previous resistance training experience. This workout is split into specific muscle groups for each of the 4 days of training per week.

However, it is often common for beginners to start with a 'full body workout' programme. If you would prefer this, please take 1 exercise from each on the 4 days training tables below, and put them together for a 'full body workout'.

FOR CARDIO

'Interval training' style to maximise time and results. Complete 10-20 minutes of Interval Training on the Treadmill, Bike, Rower or Cross-trainer (or a combination of the 4 cardio machines).

- For each minute complete 50 seconds slow/very low intensity, followed by 10 seconds of each minute at high/maximum intensity.
- Continue this 'fast/slow' switch for the entire session time.

No.	Exercise	Sets	Reps	Rest	Notes
1	Dumbbell Shoulder Press	3	8-12	60-90s	
2	Front Dumbbell Raise	3	8-12	60-90s	
3	Side Lateral Raises	3	8-12	60-90s	
4	Assisted Dips	3	8-12	60-90s	
5	Tricep Cable Pushdowns	3	8-12	60-90s	
CARDIO					

2) TUESDAY TRAINING: LEGS, INCLUDING CALVES

No.	Excercise	Sets	Reps	Rest	Notes
1	Bodyweight Squats	3	8-12	60-90s	
2	Leg Extension	3	8-12	60-90s	
3	Leg Press	3	8-12	60-90s	
4	Standing Calf Raises	3	8-12	60-90s	
5	Seated Calf Raises	3	8-12	60-90s	
CARDIO (OPTIONAL)					

3) WEDNESDAY TRAINING: REST DAY

4) THURSDAY TRAINING: BACK AND ABS

No.	Excercise	Sets	Reps	Rest	Notes
1	Lateral Pull Downs	3	8-12	60-90S	
2	Seated Cable Rows	3	8-12	60-90S	
3	Machine Rows	3	8-12	60-90S	
4	Cross Crunches	3	8-12	60-90S	
5	Plank	3	30s	60-90S	
CARDIO (OPTIONAL)					

5) FRIDAY TRAINING: CHEST AND BICEPS

No.	Excercise	Sets	Reps	Rest	Notes
1	Dumbbell Bench Press	3	8-12	60-90S	
2	Bench Press	3	8-12	60-90S	
3	Cable Crossovers	3	8-12	60-90S	
4	Cable Curls	3	8-12	60-90S	
5	Barbell Curl	3	8-12	60-90S	
CARDIO (OPTIONAL)					

6) SATURDAY TRAINING: REST DAY

7) SUNDAY TRAINING: REST DAY

GYM BASED WORKOUTS: EXAMPLE WORKOUT PLAN: INTERMEDIATE

This workout is aimed at regular 'gym goers' who partake in resistance training. This workout is split into specific muscle groups for each of the 5 days of training per week.

FOR CARDIO

'Interval training' style to maximise time and results. Complete 15-30 minutes of Interval Training on the Treadmill, Bike, Rower or Cross-trainer (or a combination of the 4 cardio machines).

- For each minute complete 45 seconds slow/very low intensity, followed by 15 seconds of each minute at high/maximum intensity.
- Continue this 'fast/slow' switch for the entire session time.

1) MONDAY TRAINING: SHOULDERS AND TRICEPS

No.	Exercise	Sets	Reps	Rest	Notes
1	Dumbbell Shoulder Press	3-4	8-12	45-60s	
2	Front Dumbbell Raise	3-4	8-12	45-60s	
3	Side Lateral Raises	3-4	8-12	45-60s	
4	Assisted Dips	3-4	8-12	45-60s	
5	Tricep Cable Pushdowns	3-4	8-12	45-60s	
6	Close Grip Bench Press	3-4	8-12	45-60s	
CARDIO					

2) TUESDAY TRAINING: LEGS, INCLUDING CALVES

No.	Exercise	Sets	Reps	Rest	Notes
1	Squats	3-4	8-12	45-60s	
2	Leg Extension	3-4	8-12	45-60s	
3	Leg Press	3-4	8-12	45-60s	
4	Dumbbell Lunges	3-4	8-12	45-60s	
5	Standing Calf Raises	3-4	8-12	45-60s	
6	Seated Calf Raises	3-4	8-12	45-60s	
CARDIO (OPTIONAL)					

3) WEDNESDAY TRAINING: REST DAY

4) THURSDAY TRAINING: BACK AND ABS

No.	Exercise	Sets	Reps	Rest	Notes
1	Lateral Pull Downs	3-4	8-12	45-60s	
2	Seated Cable Rows	3-4	8-12	45-60s	
3	Machine Rows	3-4	8-12	45-60s	
4	Cross Crunches	3-4	8-12	45-60s	
5	Plank	3	30s	45-60s	
6	V Sit-ups	3	8-12	45-60s	
CARDIO (OPTIONAL)					

5) FRIDAY TRAINING: CHEST AND BICEPS

No.	Excercise	Sets	Reps	Rest	Notes
1	Dumbbell Bench Press	3	8-12	45-60s	
2	Bench Press	3	8-12	60-90S	
3	Cable Crossovers	3	8-12	45-60s	
4	Cable Curls	3	8-12	45-60s	
5	Barbell Curl	3	8-12	45-60s	
6	Hammer Curls	3	8-12	45-60s	
CARDIO (OPTIONAL)					

6) SATURDAY TRAINING: FULL BODY WORKOUT

No.	Excercise	Sets	Reps	Rest	Notes
1	Leg Press	3	8-12	45-60s	
2	Squats	3	8-12	60-90S	
3	Push-ups	3	8-12	45-60s	
4	Bicycle Sit-Ups	3	8-12	45-60s	
5	Dumbbell Shoulder Press	3	8-12	45-60s	
6	Tricep Cable Pulldowns	3	8-12	45-60s	
7	Machine Rows	3	8-12	45-60s	
CARDIO (OPTIONAL)					

7) SUNDAY TRAINING: REST DAY

GYM BASED WORKOUTS: EXAMPLE WORKOUT PLAN: **EXPERT**

This workout is EXTREME, and aimed at gym athletes who partake in high intensity resistance training. This workout is split into specific muscle groups for each of the 6 days of training per week.

FOR CARDIO

‘Interval training’ style to maximise time and results. Complete 15-45 minutes of Interval Training on the Treadmill, Bike, Rower or Cross-trainer (or a combination of the 4 cardio machines).

- For each minute complete 40 seconds slow/very low intensity, followed by 20 seconds of each minute at high/maximum intensity.
- Continue this ‘fast/slow’ switch for the entire session time.

1) MONDAY TRAINING: SHOULDERS AND TRICEPS

No.	Exercise	Sets	Reps	Rest	Notes
1	Dumbbell Shoulder Press	3	8-12	30-60s	
2	Front Dumbbell Raise	3	8-12	30-60s	
3	Side Lateral Raises	3	8-12	30-60s	
4	Arnold Press	3	8-12	30-60s	
5	Skull-crushers	3	8-12	30-60s	
6	Close Grip Bench Press	3	8-12	30-60s	
7	Assisted Dips	3	8-12	30-60s	
8	Tricep Cable Pushdowns	3	8-12	30-60s	
CARDIO					

2) TUESDAY TRAINING: LEGS, INCLUDING CALVES

No.	Exercise	Sets	Reps	Rest	Notes
1	Squats	3-4	8-12	30-60s	
2	Leg Extension	3-4	8-12	30-60s	
3	Leg Press	3-4	8-12	30-60s	
4	Dumbbell Lunges	3-4	8-12	30-60s	
5	Hamstring Curls	3-4	8-12	30-60s	
6	Hack Squats	3-4	8-12	30-60s	
7	Standing Calf Raises	3-4	8-12	30-60s	
8	Seated Calf Raises	3-4	8-12	30-60s	
CARDIO (OPTIONAL)					

3) WEDNESDAY TRAINING: REST DAY

4) THURSDAY TRAINING: FULL BODY WORKOUT (CIRCUIT STYLE)

No.	Exercise	Notes
1	Battle Ropes	
2	Crunches	
3	Smith Machine Squats	
4	Barbell Curls	
5	Lunges	
6	Push Ups	
7	Dips	

5) FRIDAY TRAINING: CHEST AND BICEPS

No.	Excercise	Sets	Reps	Rest	Notes
1	Dumbbell Bench Press	3	8-12	30-60s	
2	Bench Press	3	8-12	30-60s	
3	Cable Crossovers	3	8-12	30-60s	
4	Incline Bench Press	3	8-12	30-60s	
5	Preacher Curls	3	8-12	30-60s	
6	Hammer Curls	3	8-12	30-60s	
7	Cable Curls	3	8-12	30-60s	
8	Barbell Curl	3	8-12	30-60s	
CARDIO (OPTIONAL)					

6) SATURDAY TRAINING: FULL BODY WORKOUT

No.	Excercise	Sets	Reps	Rest	Notes
1	Squats	3	8-12	30-60s	
2	Leg Press	3	8-12	30-60s	
3	Chin Ups	3	8-12	30-60s	
4	Machine Row	3	8-12	30-60s	
5	Skull-crushers	3	8-12	30-60s	
6	Dumbbell Shoulder Press	3	8-12	30-60s	
7	Bicycle Sit-Ups	3	8-12	30-60s	
8	Lat Pulldowns	3	8-12	30-60s	
CARDIO (OPTIONAL)					

7) SUNDAY TRAINING: BACK AND ABS

No.	Exercise	Sets	Reps	Rest	Notes
1	Dumbbell Bench Press	3	8-12	30-60s	
2	Bench Press	3	8-12	30-60s	
3	Cable Crossovers	3	8-12	30-60s	
4	Incline Bench Press	3	8-12	30-60s	
5	Preacher Curls	3	8-12	30-60s	
6	Hammer Curls	3	8-12	30-60s	
7	Cable Curls	3	8-12	30-60s	
8	Barbell Curl	3	8-12	30-60s	
CARDIO (OPTIONAL)					

HOME BASED WORKOUTS: EXAMPLE WORKOUT PLAN: **BEGINNER**

These bodyweight workouts are home based and aimed at beginners. The workout will take approx. 30-40 minutes to complete (cardio workout approx. 15-40 minutes).

EXERCISE DESCRIPTIONS:

EXERCISE 1: PUSH-UPS

Workout Advice: Push-ups are great for building muscle and strength in your chest muscles. They also work your shoulders and triceps as secondary muscle groups.

You can do regular push-ups on your toes, or alternatively modified push-ups on your knees, which are much easier and are perfect for beginners who need to increase their upper body strength.

Place your hands on the floor at shoulder width apart and then lower your chest down and gently touch the floor. Push back up and really place 100% tension on your pecs and squeeze your chest muscles.

EXERCISE 2: SIDE PLANKS AND SIDE CRUNCHES

Workout Advice: Side planks are superb for building strength in your abs, obliques and overall core.

Your core consists of the four main stomach muscles that wrap around your midsection like a belt and include the rectus abdominis, external obliques, internal obliques and transverses abdominis.

Along with these 4 muscles, your core also includes your lower back, pelvic floor and your hips. You can see why the side plank is such an important exercise for developing strong functional muscles that you use every single day.

To start the side planks, position your body on the floor and rest your upper body on your right elbow. You want to have a straight line from the top of your shoulder all the way down to your elbow with your body elongated and your feet stacked on top of each other. Start by pushing your hip up towards the ceiling and really feel the tension in your abs, obliques and lower back. Do 10-15 reps and then switch over to your left arm. If you have any shoulder issues, you can take a lot of the tension off by doing leg raise crunches which allows you to take the weight off of your shoulder joints yet still works the core muscles very well.

EXERCISE 3: LUNGES

Workout Advice: This is one of the best bodyweight exercises for toning your legs and bottom. Start by placing your left foot out in front of you and make sure to keep your back straight with good posture. Slowly lower yourself down and really try to feel the tension in the front of your leg (quadriceps).

You must not lean over during this exercise. Always keep your posture solid throughout the entire range of the movement and keep your head straight while looking directly forward. Do 10-15 reps and then switch to your other leg.

EXERCISE 4: ONE LEG DEADLIFTS

Workout Advice: These are fantastic for working your quadriceps, hamstrings and calves. One leg deadlifts also work your core muscles and trains your body for overall coordination and balance. Bend forward on one leg and slowly lower your upper body down to about waist level. This isolates one leg at a time and is excellent for toning your leg muscles. Do 15 reps and then switch to your other leg to complete a full set.

EXERCISE 5: TRICEPS PRESS WORKOUT ADVICE:

The triceps press exercise is great for toning and tightening the back of your arms (triceps).

Using a piece of furniture like your dining room table or your couch, place your hands shoulder width apart and slowly lower your upper body down to the bottom position while keeping your elbows tucked into your sides to maximize the tension on your triceps.

Push yourself back up to the top and focus on squeezing your triceps muscles as you extend your arms.

1) MONDAY TRAINING: FULL BODY WORKOUT

No.	Exercise	Sets	Reps	Rest	Notes
1	Push-ups	3	10-15	60-90s	
2	Side Planks (or Side Crunches)	3	10-15	60-90s	
3	One Leg Dead-lifts	3	10-15	60-90s	
4	Lunges	3	10-15	60-90s	
5	Tricep Press	3	10-15	60-90s	

2) TUESDAY TRAINING: CARDIO

Cardio Exercise (Choose 1 from below)	Training
Walking	<p>Complete 15-40 minutes of Interval Training as follows:</p> <ul style="list-style-type: none">- For each minute complete 50-55 seconds slow/very low intensity, followed by 5-10 seconds of each minute at high/maximum intensity.- Continue this 'fast/slow' switch for the entire session time.
Running	
Cycling	
Rowing	
Any other cardio based exercise you have the equipment or access to complete (e.g. Cross-trainer, Stairmaster, Stepper).	

3) WEDNESDAY TRAINING: REST DAY

4) THURSDAY TRAINING: FULL BODY WORKOUT

No.	Exercise	Sets	Reps	Rest	Notes
1	Push-ups	3	10-15	60-90s	
2	Side Planks (or Side Crunches)	3	10-15	60-90s	
3	One Leg Dead-lifts	3	10-15	60-90s	
4	Lunges	3	10-15	60-90s	
5	Tricep Press	3	10-15	60-90s	

5) REPEAT TUESDAY CARDIO

6) SATURDAY TRAINING: REST DAY

7) SUNDAY TRAINING: REST DAY

HOME BASED WORKOUTS: EXAMPLE WORKOUT PLAN: INTERMEDIATE

These bodyweight workouts are home based and a progression from the 'beginners' version above. The workouts will take approx. 45-60 minutes to complete (cardio days 20-45 minutes).

No.	Exercise	Sets	Reps	Rest	Notes
1	Push-ups	4-5	10-15	45-90s	
2	Side Planks (or Side Crunches)	4-5	10-15	45-90s	
3	One Leg Dead-lifts	4-5	10-15	45-90s	
4	Lunges	4-5	10-15	45-90s	
5	Tricep Press	4-5	10-15	45-90s	

2) TUESDAY TRAINING: CARDIO

Cardio Exercise (Choose 1 from below)	Training
Walking	<p>Complete 20-45 minutes of Interval Training as follows:</p> <ul style="list-style-type: none"> - For each minute complete 45-50 seconds slow/very low intensity, followed by 10-15 seconds of each minute at high/maximum intensity. - Continue this 'fast/slow' switch for the entire session time.
Running	
Cycling	
Rowing	
Any other cardio based exercise you have the equipment or access to complete (e.g. Cross-trainer, Stairmaster, Stepper).	

3) WEDNESDAY TRAINING: REST DAY

4) THURSDAY TRAINING: FULL BODY WORKOUT

No.	Excercise	Sets	Reps	Rest	Notes
1	Push-ups	3	10-15	60-90s	
2	Side Planks (or Side Crunches)	3	10-15	60-90s	
3	One Leg Dead-lifts	3	10-15	60-90s	
4	Lunges	3	10-15	60-90s	
5	Tricep Press	3	10-15	60-90s	

5) FRIDAY TRAINING - REPET TUESDAY CARDIO

6) SATURDAY TRAINING: FULL BODY WORKOUT

No.	Excercise	Sets	Reps	Rest	Notes
1	Push-ups	4-5	10-15	45-90s	
2	Side Planks (or Side Crunches)	4-5	10-15	45-90s	
3	One Leg Dead-lifts	4-5	10-15	45-90s	
4	Lunges	4-5	10-15	45-90s	
5	Tricep Press	4-5	10-15	45-90s	

7) SUNDAY TRAINING: REST DAY

HOME BASED WORKOUTS: EXAMPLE WORKOUT PLAN: **EXPERT**

This extreme full body workout plan can be performed at home or in the gym, and will take approx.1 hour to complete. (cardio workout approx. 20-55 minutes). It is aimed at athletes who are looking to build strength, endurance and really challenge themselves

1) MONDAY TRAINING: FULL BODY WORKOUT

No.	Excercise	Sets	Reps	Rest	Notes
1	Push-ups	4-5	10-15	30-45s	
2	Side Planks (or Side Crunches)	4-5	10-15	30-45s	
3	One Leg Dead-lifts	4-5	10-15	30-45s	
4	Lunges	4-5	10-15	30-45s	
5	Tricep Press	4-5	10-15	30-45s	

2) TUESDAY TRAINING: FULL BODY BLAST (COMPLETE AS QUICK AS POSSIBLE)

No.	Excercise	Sets	Reps	Rest	Notes
1	Run 1 Mile (1.6km)	1	N/A	N/A	
2	Push-ups	1	100	As needed	
3	Sit-ups / Crunches	1	100	As needed	
4	Lunges	1	100	As needed	
5	Chair Dips	1	100	As needed	
6	Bodyweight Squats	1	100	As needed	
7	Run 1 Mile (1.6km)	1	N/A	N/A	

3) WEDNESDAY TRAINING: REST DAY

4) THURSDAY TRAINING: FULL BODY BLAST (COMPLETE AS QUICK AS POSSIBLE)

No.	Exercise	Sets	Reps	Rest	Notes
1	Run 1 Mile (1.6km)	1	N/A	N/A	
2	Push-ups	1	100	As needed	
3	Sit-ups / Crunches	1	100	As needed	
4	Lunges	1	100	As needed	
5	Chair Dips	1	100	As needed	
6	Bodyweight Squats	1	100	As needed	
7	Run 1 Mile (1.6km)	1	N/A	N/A	

5) FRIDAY TRAINING: CARDIO

Cardio Exercise (Choose 1 from below)	Training
Walking	<p>Complete 20-50 minutes of Interval Training as follows:</p> <ul style="list-style-type: none">- For each minute complete 40-45 seconds slow/very low intensity, followed by 15-20 seconds of each minute at high/maximum intensity.- Continue this 'fast/slow' switch for the entire session time.
Running	
Cycling	
Rowing	
Any other cardio based exercise you have the equipment or access to complete (e.g. Cross-trainer, Stairmaster, Stepper).	

6) SATURDAY TRAINING: FULL BODY BLAST (COMPLETE AS QUICK AS POSSIBLE)

No.	Excercise	Sets	Reps	Rest	Notes

2	Push-ups	1	100	As needed	
3	Sit-ups / Crunches	1	100	As needed	
4	Lunges	1	100	As needed	
5	Chair Dips	1	100	As needed	
6	Bodyweight Squats	1	100	As needed	
7	Run 1 Mile (1.6km)	1	N/A	N/A	

7) SUNDAY TRAINING: REST DAY.

ACCOUNTABILITY...

Please send your 'before and after' pictures directly to my <https://www.facebook.com/GymWolfPT/> Facebook page, email to ian@gymwolfpt.com or post on Social Media with the hashtag #GymWolfPT so I can see how incredible your results are for myself!

Please also post your 'before and afters' in the GymWolfPT accountability group (details to follow) because not only am I really keen to see what you have achieved and are achieving, but it will also help motivate and inspire so many others in my group who are trying to achieve exactly what you have just accomplished!

THE 3-STEP
SYSTEM

THE NUTRITION PHILOSOPHY

**“TO EAT IS A NECESSITY, BUT TO EAT INTELLIGENTLY
IS AN ART”**

- LA ROCHEFOUCAULD

NUTRITION PLAN

We've now got our Mindset Plan in place, working towards a state of mind which will allow a happy fitness lifestyle to flourish in!

We've also got an amazing set of workout plans available and in place, whether you're a beginner or expert, a gym member or not.

And you can change-up as you grow and circumstances change.

However, we all know that without the right nutrition we will not get to where we want to be, no matter how often, long or hard we work-out!

To get fit, healthy and in great shape we need to put your body through the correct process, which is exactly what we are doing with the 'It's Not Too Late' programme.

Please follow the instructions in the 'Details' section below.

DETAILS

1. Each day eat three meals plus two snacks from the ideas list below. The meals are specially designed to keep blood sugar levels even, which will limit your cravings. They are also rich in super-micronutrients like vitamins which will keep you feeling alert and focused.
2. Drink water (ideally 3 litres plus per day).
3. Limited alcohol (ideally none) and no fizzy drinks.
4. If you drink tea and coffee only have green tea and black coffee.
5. Eat until you are full, do not overeat!
6. Chew your food and take your time eating the meals and snacks.
7. **FOR WEIGHT/FAT LOSS:** Aim to eat 200-300 calories less (this is your calorie deficit) than your maintenance level calorie requirement daily.

FOR WEIGHT GAIN/BULK: Aim to eat 200-500 calories more than your maintenance level calorie requirement daily.

FOR MAINTENANCE: Aim to eat your maintenance level calorie requirement daily.

EASY METHOD OF CALCULATING – SEE TABLE 7.1 BELOW.

Example: So, for a very active female weighing 160 pounds, her maintenance calorie would be 2880, thus for a 200- 300 calorie deficit she would be looking at a daily intake of 2380 calories.

Note: The above does not take height into consideration. If you require a more accurate maintenance and calorie deficit value please message me at ian@gymwolfpt.com with your 'height, weight and age'.

8. Ideally cook every meal yourself. No take-aways, no pub meals!
9. Eat as many green vegetables as you need to keep you full. Graze on vegetables all day if you can. Lightly dip them in a humous or a low-fat dressing if needed for flavour.
10. Whilst you will be choosing from the meals listed below, focus on portion size to hit your daily calorie goal. Free apps such as MyFitnessPal are useful for tracking your daily calorie intake.

TABLE 7.1 (WEIGHT IN OOUNDS [LBS])

DAILY CALORY ALLOWANCE WOMEN

Women Weight	Super Active	Very Active	Active	Moderate Active	Low Active	Sedentary
80	1600	1440	1280	1120	960	800
90	1800	1620	1440	1260	1080	900

SUGGESTED FOODS/MEALS:

On the following pages I have compiled a list of meals and snacks.

Each day pick a breakfast, lunch and dinner meal alongside two snacks.

BREAKFAST IDEAS

1) SCRAMBLED EGGS WITH GREENS: Scramble two eggs (ideally remove the yolk from one of the eggs) and serve alongside unlimited steamed green beans or spinach leaves.

2) WHOLEGRAIN TOAST WITH PEANUT BUTTER: 2 slices of wholegrain toast topped with 2tbsp peanut butter.

3) POACHED EGGS WITH SPINACH: Poach two eggs and serve with unlimited spinach leaves.

4) SEEDED GREEK YOGHURT: 150ml low fat Greek yoghurt topped with 1 tablespoon (tbsp) of sunflower seeds and 3 sliced strawberries.

5) RICE CAKES WITH AVOCADO: 2 rice cakes topped with 1tbsp low-fat cream cheese and half an avocado.

6) ALMOND CHIA PORRIDGE: Cover 3 tbsp chia seeds in almond milk and soak overnight. In the morning add a handful of blueberries.

7) BREAKFAST PROTEIN SHAKE: 250ml Almond milk blended with a handful of berries, spinach leaves, 1 scoop of whey protein and 1tbsp flaxseeds.

8) BANANA AND PEANUT BUTTER TOAST: 2 slices wholemeal toast topped with 1small mashed banana and 1tbsp peanut butter.

LUNCH IDEAS

1) PRAWN SALAD: 100g prawns with unlimited lettuce, tomato, yellow and red pepper and half an avocado. Dress with the juice of half a lemon.

2) CHICKEN TORTILLA: Fill 1 wholemeal tortilla with 150g chicken breast cut into strips, a handful of mixed salad leaves, 4 cherry tomatoes, 50g grated cucumber and 1tbsp low-fat crème fraîche.

3) BAKED SWEET POTATO WITH SALMON: Bake 1 medium sized sweet potato in the oven and cover with a can of flaked salmon, 1tsp low-fat crème fraîche and serve with a green side salad.

4) WALDORF SALAD: Combine 70g walnuts with 100g red grapes, 1 chopped apple and unlimited celery and mixed salad leaves. Stir in 1tbsp low-fat crème fraîche, 1tbsp lemon juice and serve with 1 small wholemeal pitta bread.

5) 'HEARTY' BEAN STEW: Combine half a tin of kidney beans, 1 small onion, 1 crushed garlic clove, half a tin of tomatoes, a pinch of cinnamon and a pinch of paprika, served with 50g cooked brown rice.

6) SALMON PITTA: Fill one pitta with a can of flaked salmon, a handful of watercress, 1 small beetroot and 1tbsp low-fat natural yoghurt.

7) CRUDITÉS WITH HOUMOUS: Chop unlimited carrot, celery, cucumber and peppers into strips and serve with 150g houmous and 1 wholemeal pitta bread, served warm.

8) SPANISH OMELETTE: Chop 2 sweet potatoes into small pieces and sauté with 1 red onion, 200g cherry tomatoes and 1 green pepper. Beat 2 eggs and add to the frying pan. Place under a grill until golden and serve with steamed broccoli. Makes 4 portions.

DINNER IDEAS

1) SALMON WITH GREEN VEGGIES: 1 grilled salmon fillet served with unlimited steamed green vegetables.

2) TURKEY STUFFED PEPPERS: Cook 100g turkey mince with 1 onion, 1 garlic clove and half a tin of chopped tomatoes. Add a handful of spinach and stuff inside 1 red pepper. Cook in the oven for 30 minutes. Double this recipe for two portions.

3) TOFU STIR-FRY: Sauté 1 small red onion, 1 garlic clove, 1 chilli and 1tsp ginger paste. Add 100g tofu pieces and half a bag of stir-fried vegetables. Stir in 1tbsp soya sauce and serve on a bed of grated carrot.

4) RATATOUILLE WITH QUINOA: Cook half a can of chopped tomatoes with half an aubergine, 1 courgette, 1 yellow pepper, all cut into pieces. Simmer until soft and serve with 50g cooked quino.

5) BAKED COD WITH ROASTED VEGETABLES: Place a piece of cod on some foil with 2 tbsp vegetable stock and a slice of lemon. Scatter over slices of red and yellow pepper and 1 sliced courgette. Wrap into a parcel and bake in the oven.

6) PESTO PASTA: 70g wholemeal pasta shells served with 2tbsp pesto sauce and a handful of wilted spinach.

7) HONEY-ROASTED CHICKEN: Cover 1 chicken breast with 1tbsp honey and grill. Serve with unlimited cauliflower and broccoli.

8) STEAK WITH PARSNIP CHIPS: Cut 1 parsnip into wedges and cook in the oven. Grill 100g lean steak and serve together with the parsnips and unlimited steamed kale.

9) STUFFED MUSHROOMS: Fill 2 large Portobello mushrooms with a mixture of 1 chopped tomato, wholemeal breadcrumbs, 1 beaten egg and 50g feta cheese. Serve with a green salad. Double this recipe for two portions.

SNACK SUGGESTIONS

Eat two of these each day – 1 between breakfast and lunch and 1 between lunch and dinner)

- 1 SLICED APPLE TOPPED WITH 1TBSP ALMOND OR PEANUT BUTTER.
- 1 SMALL POT OF LOW-FAT NATURAL YOGHURT WITH 1TBSP MIXED SEEDS.
- 2 RICE CAKES WITH 2TBSP HOUMOUS.
- A WHEY PROTEIN SHAKE.
- 1 STEWED PEAR SERVED WITH 2TBSP LOW-FAT NATURAL YOGHURT.
- 30G LOW-FAT CHEDDAR CHEESE.
- 1 BOILED EGG WITH 4 CHERRY TOMATOES.
- 2 OATCAKES WITH 2TBSP GUACAMOLE.
- A BANANA.

GO SMASH THIS!

You are going to get amazing results with my **'It's Not Too Late'** programme.

Read it, review it and put it into action to the best of your ability, and I guarantee you won't regret it!

However, there are a few things I want to cover with you, and the first is that I cannot do the work for you!

I will be here to support you and help you with this process as much as I possibly can, but I need you to take responsibility to put the 'gems' found in **'It's Not Too Late'** into action!

Please post into the GymWolfPT Facebook Page, and contact me via there (or by email at ian@gymwolfpt.com).

I love to see your comments, your progress photos, the struggles you've overcome, and any help and encouragement you can give others. My 'It's Not Too Late' can make you look and feel amazing if you let it.

My **'It's Not Too Late'** can make you look and feel amazing if you let it.

Your results are my number 1 priority but I also need you to be accountable for yourself.

Every week I want you to post in the accountability group (details to follow) how you are doing with the system so not only can you draw on the group for motivation but also so others can see your success and you can help motivate them on their journey.

By making the decision to try my 'It's Not Too Late' programme, and by being part of my GymWolfPT community, you are officially part of my team and I am not going to let you fail, I give you my word you will get in the best shape of your life under my guidance because I will not rest until we make it happen!!!

My goal is to get you in the best shape of your life and I promise you it is only a matter of time before we make that happen, all I ask is you give this your full commitment and put in the work required to make your goals/dreams a reality. I am totally sure you are going to smash this! I genuinely look forward to seeing your progress and transformation.

Let's Get You Into The Best Shape Of Your Life – both physically and mentally!!!

Yours in Fitness

IAN DAVID WORTHINGTON

GYMWOLFPT

“YOUR METABOLISM MAKEOVER”

Right – if you are overweight, obese, or just carrying a few to many pounds, then you’ve got to fix your metabolism!

And you know what I think about excuses.

There is no place for whining, crying and excuses in this camp!

I don’t want to hear it – “I’m just different”, “It’s my genetics”, “I’m just meant to be fat”, “My metabolism is just super slow”, “I don’t eat and the fat just appears”! – **NO, NO, NO.**

This is the sort of attitude that will most certainly see you fail before you even start. Not just in the area of health and fitness, but in life in general! Ditch the excuses – **YOU ARE GOING TO DO THIS, NO MATTER WHAT KIND OF METABOLISM YOU HAVE!**

I don’t want to hear the word genetics again! ***Ever!!!***

I have successfully coached many people with slow metabolisms, and a whole host of other ‘issues’.

They were successful, and so you will be if you follow my instructions and set yourself up to win!

The thing is.....your metabolism is the furnace that drives your body!

It’s true that some people have slower metabolisms than others – but that doesn’t mean you can’t get that furnace generating some serious heat!

If you put crap in that furnace, you will not get the fire going..... you will not get the heat!

But, if you add the best fuel, the clean and pure fuel.....you just watch that furnace go!

And the truly great thing!

Get that metabolism furnace going, and it will go all day!

So, whilst we know that by adding dry and clean wood to a furnace, we get the best fire, what should we do to get our bodies ‘furnace’ in the best and most efficient condition?

Well, here are the essentials you NEED to follow.....

1. **EAT MORE OFTEN:**

Eating good quality food on a regular basis is the number one way to 'ramp up' the speed of your metabolism.

You simply can't eat once or twice a day and expect it to work! By doing this your body isn't functioning at its best.

Eating meals 5 times (or more) each day is the best way to have it function most efficiently.

2. **INCREASE INTAKE OF GOOD QUALITY PROTEINS:**

Your body has to expend ~20-30% more energy to break down protein, which means more of the energy you take in gets burned off right away.

Every time you consume food it should have some sort of protein in it.

3. **GET GOOD QUALITY SLEEP (7-8 HOURS):**

Getting more sleep will increase how much fat you burn, as well as reducing your cortisol levels at the same time. This will help you lose 'belly fat' specifically.

4. **LIFT WEIGHTS:**

Lifting weights triggers a powerful cascade of fat-burning hormones.

Lift safely, but also lift heavy and regularly.

5. **HIGH INTENSITY CARDIO:**

High Intensity Interval Training melts fat, and FAST.

To speed up your metabolism, add a H.I.I.T sessions after you've finished lifting for the day.

6. **EAT PLENTY OF GOOD FATS:**

You need good fats in your diet to maintain a high metabolism. Fatty fish, avocado, eggs and coconut oil are all examples of good fats.

7. **EAT LOTS OF VEGETABLES:**

To work properly, your metabolism needs massive amounts of vitamins and minerals (micronutrients), which most people simply just don't get.

Vegetables such as spinach, kale, Brussels sprouts, broccoli and cauliflower are crammed full with the micronutrients your metabolism needs to burn fat quickly.

USEFUL INFOGRAPHICS

EASILY CALCULATE YOUR REQUIRED DAILY

CALORIES

STEP 1

WEIGH YOURSELF
IN POUNDS

WEIGH YOURSELF IN POUNDS FIRST THING IN THE MORNING BEFORE EATING OR DRINKING ANYTHING. IF YOUR SCALES ONLY RECORD IN KILOGRAMS, CONVERT BY MULTIPLYING BY 2.2.

STEP 2

CALCULATE YOUR
REQUIRED DAILY CALORIE
INTAKE

DETERMINE YOUR DAILY CALORIE INTAKE BY MULTIPLYING YOUR BODY-WEIGHT IN POUNDS BY:

- LOSE WEIGHT - $\times 10-13$
- MAINTAIN WEIGHT - $\times 14-16$
- GAIN WEIGHT - $\times 17-21$

STEP 3

TRACK YOUR BODY-
WEIGHT AND FURTHER
ADJUST CALORIES
ACCORDINGLY

ONCE YOU HAVE YOUR DAILY CALORIE INTAKE AMOUNT MONITOR AND ASSESS.

WHILST IT CAN TAKE TIME, IF AFTER A COUPLE OF WEEKS YOU ARE NOT SEEING PROGRESS MAKE SMALL CALORIE ADJUSTMENTS.

The Best Ways To Measure

FAT LOSS

TAKE

PROGRESS PHOTOS

Take regular full body photos.

Make sure the photos are taken in the same surroundings, lighting and position(s).

Often changes in our bodies are not representative of changes in our weight.

TAKE

MEASUREMENTS

Take regular body measurements.

Good body measurements to take are:

- Waist
- Chest
- Thigh
- Bicep

Take measurements at least every two weeks.

TRACK

YOUR WORKOUTS

Track each and every workout.

You can do this with a Gym Logbook, or better still the GymWolfPT App.

If your strength is increasing, but your body-weight is the same it is most likely due to a change in body composition.

WEIGH

YOURSELF

Weigh yourself daily or weekly.

Ensure you take weight measurements using the same scales and at the same time of the day.

I highly recommend you take weight measurements when you first wake up - before you eat or drink anything.

KNOW YOUR PROTEIN POWDERS

 <h2>STANDARD WHEY</h2> <ul style="list-style-type: none"> • Usually 75-85% protein content. • The highest calorie option. • The cheapest option 	 <h2>WHEY ISOLATE</h2> <ul style="list-style-type: none"> • Usually 90-95% protein content. • Lowest calorie option. • Usually the most expensive option • Virtually zero lactose or fat.
 <h2>CASEIN</h2> <ul style="list-style-type: none"> • Usually 75-90% protein content. • Slows rate of protein breakdown. • Great for use at night, due to slow release properties. • Delayed peak in blood amino acid levels. 	 <h2>DIET WHEY</h2> <ul style="list-style-type: none"> • Lower carbs and fat content than standard whey. • Usually 65-75% protein content.

KNOW YOUR CARB SOURCES

 <h2>HIGH CARB</h2>	 <h2>LOW CARB</h2>
<ul style="list-style-type: none"> • POTATOES • QUINOA • BREAD • WHITE RICE • OATMEAL • PASTA • BANANAS • SWEET POTATO 	<ul style="list-style-type: none"> • BROCCOLI • CELERY • KALE • BUTTERNUT SQUASH • CAULIFLOWER RICE • BERRIES • ZUCCHINI • ASPARAGUS

HOW TO ENJOY THE GYM

- GET A WORKOUT PLAN TO FIT YOUR LIFESTYLE, NOT THE OTHER WAY AROUND!
- TRACK YOUR WORKOUTS, PROGRESS AND SUCCESS.
- SET MEASURABLE GOALS - SHORT, MEDIUM AND LONG TERM.
- TRAIN TO MUSIC!
- WORKOUT WITH A FRIEND(S).
- MAKE IT AN APPOINTMENT - WORK OUT AT THE SAME TIME AND ON THE SAME DAYS WHEREVER POSSIBLE.
- ADD EXERCISES THAT YOU ENJOY, AS WELL AS THOSE THAT CHALLENGE YOU.
- CHANGE YOUR WORKOUT PLAN EVERY 6-12 WEEKS.
- CELEBRATE YOUR SUCCESSES, AND LEARN FROM YOUR FAILS!
- KNOW THAT THE GYM IS YOUR PLACE, NO ONE HAS A GREATER RIGHT TO BE THERE THAN YOU!

SOURCES OF PROTEIN

ANIMAL PROTEIN	PLANT PROTEIN
<ul style="list-style-type: none"> • CHICKEN • TURKEY • STEAK • EGGS • TUNA • SALMON • MILK • GREEK YOGHURT • CHEESE 	<ul style="list-style-type: none"> • TOFU • CHICKPEAS • LENTILS • CASHEWS • ALMONDS • OATS • QUINOA • BEANS • PEANUT BUTTER 

MAXIMISE YOUR FAT LOSS

FOLLOW A PROVEN PLAN

TRACK YOUR CALORIES & PROGRESS

HIRE A GREAT COACH

STAY CONSISTENT & STICK WITH IT!

TESTS TO CHECK YOU ARE MAKING PROGRESS

AMRAP

As Many Reps As Possible
with a significantly heavy
weight.

- ✓ Good test for strength
- ✓ Good test for hypertrophy
- ✗ Not always representative of maximum strength.

1 REP MAX

One Rep Only Maximum
Test With Heaviest Weight
Possible

- ✓ Good test for strength
- ✓ Good test for hypertrophy
- ✓ Often used by Powerlifters and Strongman Contestants

10 REP MAX

Ten Reps Maximum With
Slightly Heavier Weight
Each Phase Of The Test

- ✓ Good test for gym goers & bodybuilders
- ✓ Good test for hypertrophy
- ✗ Not a good test for strength
